Screen presents its top accolade to Kemtek at Ipex

Screen held its annual 'Screenies' awards at Ipex, which recognise the outstanding success resellers have in promoting Screen's products and solutions. The Mikado Award, celebrating the Distributor of the Year, went to Kemtek Imaging Systems of South Africa.

"In a challenging year, one distributor overperformed to such a degree that we have given the top award to Kemtek," says Screen UK managing director Brian Filler. "Their exceptional performance saw them double their turnover in a record year under adverse conditions. Their success is down to great products, great support, great marketing initiatives and customer relationships."

Kemtek hosted several successful shows and open days over the year and sales highlights included the Truepress Jet2500UV wide format inkjet printing system and a string of VLF PlateRite platesetters with full automation.

Kemtek CEO Gavin van Rensburg says: "The future is looking very strong. By providing our customers with top class products, we have a strong position in the digital printing market as well as the prepress sector."
