Screen appoints Schneidler Grafiska AB as distributor of its revolutionary Truepress JetSX in Scandinavia

Amstelveen, The Netherlands, 2nd March 2010 - Screen is pleased to announce that it has appointed Schneidler Grafiska AB as its distributor to sell and support the revolutionary Truepress JetSX inkjet press throughout Denmark, Sweden and Norway.

The Truepress JetSX, is the world's first full-colour B2 sheet-fed inkjet press. First seen at Drupa as a prototype, the TruepressJet SX will make its commercial debut at IPEX. The inkjet press combines high-quality and productivity with the ability to print single-pass duplex, opening up a huge array of opportunities to produce many value-added products.

"Screen has the perfect partnership with Schneidler Grafiska and it has been an important addition to our European distribution network," said Frans Kops, Screen's Northern European Sales Manager. "They are a well established supplier to the large format digital market and the Truepress Jet SX will make a great addition to their Screen portfolio."

A supplier to the graphic arts market since 1805, Schneidler Grafiska, part of the Schneidler Group, supplies a wide range of pre-press, print finishing products and consumables with full support. The Schneidler Group is a privately owned group of companies which imports and markets equipment and consumables to the graphic arts and printed circuit board industries.

The Truepress JetSX has the ability to output to B2-width on a variety of media types, making it ideal for high-level hybrid printing systems, overprinting variable data on offset-produced material. With the renowned paper handling technology of Screen's Truepress series, the Truepress JetSX has precise registration to equal that of offset. It features a high-precision inkjet head that can output at 1,440 x 720 dpi to produce text and images of a quality to rival offset.

Jesper Skantze, President, Schneidler Grafiska AB says: "We are delighted to welcome Screen's TruepressJet SX to our Screen portfolio. Screen's range of digital devices makes us perfectly equipped to meet the demands of the digital inkjet market in Scandinavia."
