

SCREEN EUROPE ADDS DOCUBOXX WEBSHOP TO EQUIOSNET PARTNERSHIP PROGRAMME

15th April 2011: SCREEN Europe has added Docuboxx Webshop from ISI publishing innovators in the Netherlands to its EQUIOSNET partnership programme and made Docuboxx web-to-print solutions available through its European sales channels.

The EQUIOSNET partnership programme is Screen's collaboration scheme with reliable partner vendors to enable the addition of extensive automation capabilities to the Screen EQUIOS workflow. Screen has selected ISI publishing innovators based on the company's extensive experience in JDF-enabled web-to-print solutions. Its family of Docuboxx web-to-print solutions range from form-based variable document creation and approval, to a complete Webshop with payment services for business-to-business or business-to-consumer transactions.

Using Docuboxx Webshop (Screen Edition), Screen EQUIOS users will be able to create a document webshop to manage the ordering, upload and checking of files for printability with automatic integration, via JDF, into Screen's EQUIOS production system.

Sjaak Veeken, workflow product manager for Screen Europe, explained "Screen has always provided a highly automated workflow for its customers and today that has to include web-to-print. The EQUIOSNET partnership programme guarantees that leading print production tools can be integrated into Screen's market-leading workflow solution and we are delighted to add ISI and its Docuboxx solution."

Menno Mooij from ISI publishing innovators adds: "We are the market leader InDesign Server based web-to-print solutions in the Benelux and we are delighted to work with an international partner like Screen Europe to develop our distribution across Europe."

###

About Screen

As a precision manufacturer with a long history of building innovative imaging technologies, Screen develops and manufactures expert digital printing technologies for high-end professional print on demand applications. The company provides a 360 degree service delivering total solutions spanning workflow automation, digital printing devices, finishing partnerships, ink and substrate expertise and support. www.screeneurope.com

About Docuboxx

Docuboxx is a family of solutions to enable companies in publishing production to order, create, and approve static and variable documents. Docuboxx family integrates different modules: Docuboxx Webshop – the transactional part of web-to-print; Docuboxx Generator – form based document creation and approval using Adobe InDesign Server; Docuboxx Designer – flash based free document creation; Controlboxx – upload and PDF checking
